

Code-Layout, Readability and Reusability

Date	9 March 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed	Remarks
1	Consistent Indentation	Uniform spacing and indentation used throughout the project.	Yes	Proper Python indentation (PEP 8).
2	Proper File Structure	Files and folders are logically organized.	Yes	Separate folders for templates, static files, models, and datasets.
3	Meaningful Variable Names	Variables clearly describe their purpose.	Yes	Variables such as <code>income</code> , <code>prediction</code> , and <code>model</code> are descriptive.
4	Function / Method Names	Functions are easy to understand.	Yes	Functions like <code>predict()</code> , <code>load_model()</code> , and <code>preprocess_data()</code> are descriptive.
5	Code Comments	Comments explain important code sections.	Yes	Comments added for preprocessing, training, and prediction.
6	Modular Design	Code is divided into reusable modules.	Yes	Training, prediction, and web application are separated into different files.
7	No Redundant Code	Duplicate code is minimized.	Yes	Reusable functions are used throughout the project.
8	Error Handling	Errors and exceptions are handled properly.	Yes	Form validation and exception handling are implemented in Flask.

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	train_model.py	Python	Model Training	High
2	app.py	Flask (Python)	Backend Application	High
3	HTML Templates	HTML, Bootstrap	User Interface	High
4	Machine Learning Model (model.pkl)	Scikit-learn, Joblib	Prediction Module	High
5	Data Preprocessing Functions	Pandas, NumPy	Training & Prediction	High

Overall Code Quality Assessment

Aspect	Rating (1–5)	Comments
Code Layout & Structure	5	Project follows a clear folder structure with organized modules.
Readability	5	Clean, simple, and well-formatted code with meaningful names.
Reusability	5	Reusable functions and model files reduce duplicate code.
Documentation / Comments	5	Important sections are documented with comments.
Overall Score	5 / 5	Well-structured, maintainable, and reusable machine learning application.
