

Project Demo Planning

Date	10 July 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demonstration is essential to present the **Credit Card Approval Prediction System** effectively. The demo highlights the problem statement, machine learning solution, web application, prediction process, and deployment. Each team member is assigned specific responsibilities to ensure a smooth and organized project presentation

Project Demo Schedule

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, objectives, and problem statement.	2	Team Leader
2	Dataset & Model Overview	Explain the dataset, preprocessing, feature engineering, and machine learning algorithms used.	3	Team Member 1
3	Flask Web Application	Demonstrate the user interface and explain how applicant details are entered.	2	Team Member 2
4	Live Prediction Demo	Enter applicant details and display the prediction result (Approved/Rejected).	3	Team Member 3
5	Deployment Process	Demonstrate local deployment using Visual Studio Code and Flask.	2	Team Leader
6	Conclusion & Future Scope	Summarize project outcomes, advantages, and future enhancements.	2	Team Leader

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why credit card approval automation is important and the challenges of manual processing.
2	Solution Overview	Describe the dataset, preprocessing, model training, XGBoost selection, and Flask application architecture.
3	Live Feature Demonstration	Run the Flask application, enter applicant details, and show the prediction result in real time.
4	Q&A Session	Answer questions related to the dataset, machine learning model, deployment, and future improvements.
