

Team Involvement in Demonstration

Date	10 July 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and responsibilities of each team member during the demonstration of the **Credit Card Approval Prediction System**. Every member contributed to presenting different aspects of the project, including machine learning model development, data preprocessing, Flask web application development, deployment, testing, and documentation. The responsibilities were distributed equally to ensure a successful project demonstration.

Team Participation Details

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation
1	Yellamanda Kiran	Team Leader & ML Developer	Introduction, Problem Statement & Machine Learning Model	Explained project objectives, workflow, machine learning algorithms, and coordinated the overall project demonstration.	Active
2	Anitha Nalini Mogili	Data Preprocessing Engineer	Dataset & Data Preprocessing	Presented dataset collection, data cleaning, feature engineering, missing value handling, and preprocessing techniques.	Active
3	Alekhyia Pradayini Giddaluri	Flask Web Developer	Flask Web Application	Demonstrated the Flask web interface, applicant data entry form, and prediction workflow.	Active
4	Lahari Pettela	Data Visualization & Testing	Exploratory Data Analysis & Testing	Explained data visualization, performance testing, functional testing, and model evaluation results.	Active

5	Puneeth Kumar A	Deployment Engineer	Deployment & Cloud Integration	Demonstrated local deployment, GitHub integration, IBM Watson Machine Learning deployment, and project execution.	Active
6	Entire Team	Question & Answer Session	Conclusion & Future Scope	Answered questions, summarized project outcomes, discussed future enhancements, and thanked the evaluators.	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	Yellamanda Kiran
Overall Team Coordination Rating (1–5)	5 / 5
Any Issues During Demo	Minor delay while loading the Flask application and deploying the machine learning model.
How Issues Were Resolved	The application was restarted, dependencies were verified, and the demonstration continued successfully without affecting the overall presentation.
